01 Foundational Concepts of Analytics

01. Business Analytics: Its the process thats more directed at retrieving information from graphical representations to advance business decision-making processes and strategic planning.

Mark Gavin (2019) Business Analytics: What it is and why it's important
https://online.hbs.edu/blog/post/importance-of-business-analytics

02. Data Analytics: It's the process of retrieving raw data, performing data cleaning, aggregation or processing using specific tools to produce valuable findings presented as graphical presentations for business decision-making. E.g businesses identifying customers patterns or trends to retain customers and acquisition.

The INVESTOPEDIA TEAM (2026) Data Analytics: What it is, How it's Used, and 4 Basic Techniques.
https://www.investopedia.com/terms/d/data-analytics.asp

03. Business Intelligence: An innovative process used to analyze data, presenting data through visualize like graphs and creating dashboards providing reports and allowing other individuals to access data. E.g. businesses conducting conversion tracking, personalized marketing, churn reduction.

https://analytics.hbs.edu/admissions/business-intelligence-vs-business-analytics/

04. Data-Driven Decision Making: It's ~~the process of retrieving and data~~ a decision-making approach that guides a business decision derived from the use of data analysis outcomes. E.g Enhancing and prioritizing positive customer satisfaction scores by ensuring product quality

Team Asana (2025) Data driven decision making: Benefits and 6 steps to use
https://asana.com/resources/data-driven-decision-making

05. Big Data: Its large amounts of different types of data collected from multiple data sources that includes structured, semi-structured and unstructured data, with businesses ensuring

implementation processes for data validation, quality and accuracy. E.g Scale-up and down of product quantity by analyzing seasonal trends.

Adobe Experience Cloud Team. (2025) What is big data?. https://business.adobe.com/blog/basics/big-data

06. Descriptive Analytics: This type of analytics is used to describe the context of data already used and existing e.g Pie chart graph used to break down the demographics of a businesses clients.

Catherine Cote. (2021) 4 Types of Data Analytics to Improve Decision-Making https://online.hbs.edu/blog/post/types-of-data-analysis

07. Diagnostic Analytics: This type of analytics helps to identify the root cause of something. It assists in answering a particular questions related to the situation.

Catherine Cote. (2021) 4 Types of Data Analytics to Improve Decision-Making https://online.hbs.edu/blog/post/types-of-data-analysis

08. Predictive Analytics: This type of analytics is data that already exists and businesses use it to identify certain patterns assisting the business to make predictions on what might happen in the future based on this data. E.g Impactful changes in customer demographics on how it can positively or negatively affect a product range.

Catherine Cote. (2021) 4 Types of Data Analytics to Improve Decision-Making https://online.hbs.edu/blog/post/types-of-data-analysis

09. Prescriptive Analytics: This analytics enables businesses to provide direction on business strategies, marketing tools or business ~~analytics~~. It ~~enables a business to make future~~ decisions for better outcomes based on forecasted future ~~decisions based on existing data and reasonable~~ outcomes

E.g customer grouping ~~into~~ according to attributes and marketing personalization.

Catherine Cote. (2021) 4 Types of Data Analytics to Improve Decision-Making https://online.hbs.edu/blog/post/types-of-data-analysis

10. Data Literacy: Its the ability of reading, interpreting, understanding and presenting data in an important way for better decision-making.

Gary Allemann (no date) What is data literacy and why is it important https://blog.masterdata.co.za/2019/12/03/what-is-data-literacy-and-why-is-it-important/

02 Data, Measurement and Reporting

11. Structured Data: Data that is consistent, factual, organized and stored in tables with rows and columns e.g spreadsheets and application forms.

geeksforgeeks.org. (2025) https://www.geeksforgeeks.org/dbms/difference-between-structured-semi-structured-and-unstructured-data/

12. Unstructured Data: Data that does not have a consistent format, not organized and has no specific format e.g videos and social media posts.

geeksforgeeks.org. (2025) https://www.geeksforgeeks.org/dbms/difference-between-structured-semi-structured-and-unstructured-data/

13. Data Warehouse: A data warehouse is the central database that stores large amounts of data from different database source for analytical processing e.g point-of-sale systems, customer relationship management (CRM) systems.

aws (n.d) https://aws.amazon.com/what-is/data-warehouse/

14. Data Mining: Data mining is the process of analyzing large datasets to discover certain patterns, particular customer behaviors, analyzing specific trends and developing useful information.

Databricks (n.d) https://www.databricks.com/blog/what-is-data-mining

15. Data Visualization: Its the process of converting data into readable findings by using visual elements like charts, graphs etc to display trends, patterns on the data.

IBM https://www.ibm.com/think/topics/data-visualization

16. Dashboard: Is the graphical representation layout put together collectively with descriptive outlining the findings from the data analysis performed.

Tableau (n.d) https://www.tableau.com/dashboard/what-is-dashboard

17. Metrics: A criteria or measurable tools used for evaluating and rating performance if does it meet the particular standard required.

Julie Young, (2025) ~~Metrics~~ Understanding Metrics: Key to Performance Tracking and Analysis

https://www.investopedia.com/terms/m/metrics.asp.

18. Key Performance Indicator (KPI): Are outlined indicators that evaluate growth set at that particular organizational level to align performance with strategy to evaluate outcomes and drive decision-making.

Alexandra Twin. (2026) KPIs: What are Key Performance Indicators? Types and Examples.

https://www.investopedia.com/terms/k/kpi.asp.

19. Benchmark: Serves as a location of reference used to measure a business performance, product sales or processes organize recognized standard by identifying areas of improvement.

Alicia Realburn, (2025) What is benchmarking? How to set a benchmark

https://asana.com/resources/benchmarking

20. Segmentation: A process of dividing customers into certain groups based on certain traits like behaviors, buying habits and shared characteristics like age, location, demographics etc.

Hery Hoening. (2025) Understanding market segmentation: A comprehensive Guide.

https://www.investopedia.com/terms/m/market-segmentation.asp

03. Customer and Sales KPIs

21. Conversion Rate: Is the percentage of website interaction by customers by taking an action e.g making a purchase, signing up for a newsletter or even creating an account on the website.

dashthis (n.d). https://dashthis.com/kpi-example/ecommerce-conversion-rate/

22. Customer Acquisition Cost (CAC): The average amount it takes for a business to be given a new customer by taking into consideration resources and expenses incurred focusing at gaining and transforming potential customers into actual paying customers.

CFI Team. (2019) Customer Acquisition Cost (CAC) https://corporatefinanceinstitute.com/resources/accounting/customer-acquisition-cost-cac/

23. Customer Lifetime Value (CLV/LTV): It measures the total amount of money generated by the business from the customer by looking at the duration period a customer stays from the business and the amount of money spent over lifetime of the relationship.

IBM (n.d) https://www.ibm.com/think/topics/customer-lifetime-value

CLV & CAC: This ratio is to evaluate and understand the business performance. The less a business spends on acquiring a customer, than the amount one customer spends on the business, the more the business can gain. A healthy ratio is: (CLV : CAC)

Oracle NetSuite (n.d) https://www.netsuite.com/portal/resource/articles/erp/customer-acquisition-cost.html

24. Churn Rate: The rate at which customers stop purchasing products or requiring service discontinuation e.g discontinuing a subscription.

The investopedia Team, (2025) Churn Rate: Definitions, Examples and Calculations https://www.investopedia.com/terms/c/churnrate.asp

25. Customer Retention Rate: An important rate that is a key performance indicator used to evaluate the capabilities a business can preserve current customers over a particular period of time.

Marwa Majka. (2024) Research Gate: Understanding Customer Retention Rate https://www.researchgate.net/publication/381402420_Understanding_Customer_Retention_Rate

26. Net Promoters Score : Is a customer experience program used by businesses for customers to provide feedback on the products, services and recommendations to better improve their product quality, better customer service and adding loyalty programs.

Tim Vipond (2019) Net Promoter Score (NPS)

https://corporatefinanceinstitute.com/resources/valuation/net-promoter-score-nps/

27. Average Order Value (AOV) : A metric used to monitor the amount of money spent by the customer when they placing an order.

CFI Team (2019) Average Order Value (AOV)

https://corporatefinance.institute.com/resources/valuation/average-order-value-aov/

28. Sales Funnel : Provides a map of a customer journey from the point of engagement to placing the order.

Tech Target (n.d) https://www.techtarget.com/searchcustomerexperience/definition/Sales-funnel

04. Marketing and Campaign Analytics

29. Marketing Campaign : Is a designed promotional technique used to accomplish certain business objectives by showcasing the business products, services or brands on different platforms of engagement for customers to engage and interact.

BIGcommerce essentials (n.d) https://www.bigcommerce.com/glossary/marketing-campaigns/

30. Post-Campaign Analysis : Is a report that involves the effectiveness of the marketing campaign, to assess its success to produce the results it was required to achieve and also to use as a guide for future strategic planning purposes.

comphouse (n.d) https://comphouse.io/blog/post-campaign-analysis#h-what-is-post-campaign-analysis

31. Incremental Revenue: It's an additional income generated from a marketing campaign by adjusting certain things like adding of specific range of products, doing price adjustments etc.

Carlos Cerea. (2025) Incremental Revenue Breakdown: Formula, Examples and Growth.

https://www.ringy.com/articles/incremental-revenue

32. Return on Investment (ROI): Used to measure how much revenue is generated from that campaign compared to the campaigns initial cost, by outlining its effectiveness.

Jansen Fernando. (2026) What is return on Investment (ROI) and How to calculate it

https://www.investopedia.com/terms/r/returnonnvestment.asp

33. Return on Ad Spend (ROAS): This initial calculates the revenue received per amount spent on that marketing campaign and also calculating the business to assess the effectiveness of the campaign.

Kelly Bailey. (2025) Return on Ad Spend (ROAS): A Key Financial and Marketing Metric.

https://www.corporatefinanceinstitute.com

34. Click-Through Rate (CTR): This metric measure the interaction and engagement of potential buyers and actual buyers, who clicked on the link, email, ad and ad pop-ups to view the contents of the campaign after clicking it.

Adam Hayes. (2026) Understanding Click Through Rate (CTR): Definition, Formula, Importance

https://www.investopedia.com

35. Bounce Rate: It measures the number of people that leave the website or page without even interacting or engaging by clicking on other pages except on the page the link directed them to.

Adobe Communications Team. (2022) Ecommerce bounce rate - What it is, why it matters and how to improve it.

36. A/B Testing: A testing method used to perform an experiment between two similar campaigns, to assess which one will achieve the intended goal by evaluating its performance and success.

Adobe Communications Team. (2025) A/B Testing - What is it, examples, and best practices.
https://business.adobe.com/blog/basics/learn-about-a-b-testing

37. Lead Generation: Is a strategic technique used by businesses that attract prospect customers to engage and interact with their products, services & brands by turning them into actual customers.

amazon ads (n.d) https://advertising.amazon.com/library/guides/lead-generation

38. Marketing Attribution: It's an important steps of analyzing the business marketing strategies and customer engagement towards these marketing strategies like clicks, ad interaction, email opens throughout the customers lifecycle can contribute to a business sales, conversions and other business defined goals.

Courtney Wagner. (2025) Marketing attribution: What is it, and how do you use it?
https://supermetrics.com/blog/marketing-attribution
